## CATALOGUE ESSAY

The Seabreacher X is one of the most advanced submersible watercraft that we have built to date. This exciting version is similar in size to the J model, but with higher performance and a more aggressive shark style body. The X model also steps up the performance envelope with a 260hp supercharged engine. The new patented fully vectored thrust system mimics the tail articulation of real aquatic animals like sharks and dolphins.

The X Model's smaller control surfaces make it a more agile and responsive vessel, allowing it to jump 90° out of the water. The X model is purpose built for pilots who want to get the most out of their Seabreacher watercraft.
