Controller - Hand Controller Via Wireless Bluetooth Technology
Speed - 40 km/h (21 Kn)

DIMENSIONS

Length - 1,7 Meters (5'7 Feet)
Beam - 0,90 Meters (2,9 Feet)
Weight - 30 kg (66 lb)

ACCUMULATORS

Battery - Lithium-Ion 44 Volts
Operating time - Ø 60 min
Standard charging - Ø 90 min
Quick charging - Interchanged

CATALOGUE ESSAY

We worked on our E-foil, like our Redwoodpaddle stand up paddle boards or our Manatee surfboards! The board to be placed on the electric foil must be chosen according to its size and experience in sliding sports and/or "classic" foil. The electric foil is separated from the board, which will allow the board to be adapted according to its weight, but also the possibility of changing boards according to the evolution of one's own practice. A beginner will easily start with a large inflatable board for example but will be able to move on to a small rigid board over time for more manoeuvrability.
