CATALOGUE ESSAY

The 106.7m three-masted sailing yacht, Black Pearl, built by Oceanco and delivered to her owner in 2018, is the result of an evolutionary design by Ken Freivokh Design, Nuvolari Lenard and Villate Design. A multi-level central atrium includes an all-glass lift that rises alongside the central mast, contributing to a feeling of vertical integration between the decks. Dykstra Naval Architects designed Black Pearl's DynaRig carbon masts and sailing system. All 2,900 square metres of sails can be set at the push of a button in 7 minutes! BMT Nigel Gee collaborated with Oceanco to create Black Pearl's hybrid propulsion system as well as other onboard systems such as waste heat recovery. In addition to wind power, she is powered by 2 x 1080kW MTU's / 2 x 400kW electrical propulsion motors. Her accommodations include a master suite, 2 VIP suites, 2 double guest cabins and a full beam beach club, that is convertible into a cinema.
